Software Engineer

[Portfolio Website](#) | [GitHub](#) | [LinkedIn](#)

Software Engineer with experience building and scaling production web applications using modern technologies including JavaScript, SvelteKit and React. Focused on delivering intuitive, high-performance user experiences while collaborating across engineering, design and product teams to solve complex problems and drive product impact.

SKILLS

Frontend: SvelteKit, React, Next.js, JavaScript, HTML5, CSS3, Tailwind

Backend: Node, Golang

Tools & Practices: Playwright, Jest, Vitest, Scrum, Kanban, Accessibility (a11y), REST API integration, Claude

SOFTWARE ENGINEERING EXPERIENCE

Software Engineer

Fetch (formerly Fetch Rewards)

Remote

April 2022 - Present

- Owned development of core frontend features in Mission Control, Fetch's B2B dashboard, building scalable UI patterns that supported growth from a few pilot partners to hundreds of active users.
- Resolved technical debt and CI/CD issues, improving deployment reliability and strengthening project stability through proactive, expanded E2E test coverage.
- Mentored junior engineers, reinforcing team best practices while deepening expertise through knowledge sharing and code reviews.
- Expanded internal UI component libraries and micro-frontend architecture, enabling faster feature development and consistent UI patterns across teams.
- Leveraged AI-assisted tooling (Claude) to accelerate debugging, research and documentation workflows while maintaining full ownership of implementation decisions.

Software Engineer Apprentice

Fetch (formerly Fetch Rewards)

Remote

February 2022 - April 2022

- Contributed to Mission Control, a high-visibility B2B dashboard used by internal teams and external partners to monitor business performance.
- Built and styled reusable UI components with SvelteKit and Tailwind CSS, improving UI/UX consistency and usability across the application.
- Collaborated with backend, QA and design in a cross-functional team using a Kanban workflow to deliver features iteratively.
- Adapted quickly to Fetch's fast-paced engineering culture, delivering high-quality work on a leadership-visible product.
- Supported fellow apprentices by troubleshooting technical challenges and sharing implementation strategies, helping peers overcome blockers and maintain project momentum.

Software Engineering Student

Chegg Skills (formerly Thinkful)

Remote

September 2021 - January 2022

- Built mobile-first, full-stack applications and collaborated in team-based workflows, applying modern software engineering practices.

EDUCATION

Certificate, Software Engineering

Chegg Skills (formerly Thinkful)

Remote

September 2021 - January 2022

Bachelor of Arts, Music Performance

Augsburg University

Minneapolis, MN

January 2018 - May 2019

Music Performance

McNally Smith College of Music (school closed December 2017)

St. Paul, MN

September 2014 - December 2017
